Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's arguments regarding claims 1, 4, 8, 15 have been fully considered but they are moot in view of the new grounds of rejection presented in this Office Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1, 7, 8, 14, 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Fintel et al (US 5,903,478).

Regarding claim 1, the claimed computer readable code for implementing a visually-oriented technique for navigating an object model is met by the fact that the system of Fintel allows displaying and navigating an architecture visual model including a plurality of objects (see the abstract, column 2, lines 15-44). The claimed sub process for displaying a browser merely reads on the fact that the system of Fintel includes user interfaces used to edit the model. The claimed sub process for retrieving and displaying a set of elements in said browser, said elements representing said object model is met when the system allows users to retrieve and display information such as customer, product (see Figure 181). The claimed sub process for enabling a user to select one of said elements, sub process for retrieving and displaying relationship information from

Art Unit: 2171

said model when said selected element is a component of said model and sub process for enabling said user to select one or more relationships from said displayed relationship information are met when Fintel shows that the user can navigate and edit relationships (see Figures 175-201). Clearly, in order to edit relationships, all the claimed sub routines have to be present in the system taught by Fintel.

Regarding claim 7, Fintel shows a conventional browser (see Figures 194, 195).

Claims 8, 14 correspond respectively to a system for the computer program product of claims 1, 7, therefore are rejected for the same reasons stated in claims 1, 7 above.

Claim 15 corresponds to a method for the computer program product of claim 1, therefore is rejected for the same reasons stated in claim 1 above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 3-6, 10-13, 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fintel et al (US 5,903,478), in view of applicant's admitted prior art at pages 3-5, 25.

Regarding claims 3, 5, although Fintel does not explicitly show an action list, applicant admitted that techniques for performing action choices are well known in the art (see page 25, line 4). Since the browser in the system of Fintel is an interactive tool

Art Unit: 2171

for developing an object model, it would have been obvious to one of ordinary skill in the art to include a sub process for presenting an action list in order to allow the user to navigate through possible actions with each element.

Regarding claim 4, since relationships possess different characteristics, it would have been obvious to one of ordinary skill in the art to include in the action list actions tailored to the selected one or more relationships.

Regarding claim 6, official notice is taken that it is well known in the art to filter an action list to limit the choices appropriate to each model. Therefore, it would have been obvious to one of ordinary skill in the art to include filtering the action list while implementing the code in order to limit the actions appropriate to each model in the system of Fintel.

Claims 10-13, 17-20 correspond respectively to a system and method for the computer program product of claims 3-6, therefore are rejected for the same reasons stated in claims 3-6 above.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chow et al (US 5,642,511) teach a system and method for providing a visual application builder framework.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
